

Topaz i5 - 11th Gen Simply NUC Mini NUC11TZi5

High-Speed Performance

Featuring the new 11th Gen Intel Core mobile processor with Xe graphics, and support for high-speed 3200MHz DDR4 memory, Topaz is a new performance-driven small form factor PC. At home, stream 4K video, play games, or finish your homework. At work, Topaz keeps you productive -- perfect for content creation, multitasking, and video conferencing. The Tiger Lake-based processors and high-speed memory remove bottlenecks keeping you on task or helping you relax while tucked behind a TV or monitor via the included VESA plate.

Feature Rich for Versatility

Topaz supports up to four displays simultaneously, with up to 4K resolution at 60Hz for each monitor. Intel Dual ethernet with 2.5Gbps and 1Gbps speeds allow you to connect to multiple networks. Topaz also features TPM for sensitive communications where encryption is required. Take advantage of Intel® Wi-Fi 6

(802.11ax) with high-speed connectivity enhanced for efficient bandwidth usage in environments with many connected devices. Topaz has ample accommodation for all your peripheral devices with four front 10Gbps SuperSpeed USB ports plus two rear Hi-Speed USB Type-A ports. And if six USB ports is not enough, add a functional lid to your configuration for more I/O connections.

Efficiency by Design

Topaz, built on Intel 11th Gen architecture, provides greater system performance over previous generations with advanced hyperthreading technologies driving faster speeds and enhanced graphics. Cloud computing, immersive gaming, and streaming all demand increasing computing performance with optimal energy efficiency. From the very beginning, Intel engineers designed their "Tiger Lake" core to meet those demands with more core throughput, larger caches, and powerful multi-threading capabilities.
